

The Agentic Developer

Bug report in. Pull request out. Same gates outside the repo.

Hi, I'm

**Debbie
O'Brien**

Independent Developer Educator

I build agent workflows for real life and real work.

debbie.codes

Bug report in.
Pull request out.
You still merge.

Then the same pattern outside the repo.
Book swimming. Shape a bio. I still say yes on the big stuff.

Then → now

Same tools. Bigger job.

SHIFT 2025

Agentic testing

Playwright + MCP. An LLM opens a real browser, writes tests, heals them.

SHIFT 2026

Agentic developer

Bots hunt bugs, book swimming, and write drafts. I still approve the merge, the booking, and the words.

Last year felt big. This year I'm living with it.

Give each bot one clear job. You keep the yes.

Not one mega-agent. Not magic auto-merge.

BOTS

One job. Hard edges.

Hunt. Fix. Travel. Stage. Each bot gets one clear job.

ONE CLEAR JOB

Compose, don't mush

Don't ask one prompt to find the bug and invent the PR.

HUMAN GATES

You still decide

Merge. Slot. Taste. Identity. Ask. Don't invent.

Why this title

Why **Agentic Developer**, not just agentic tester?

WORK

Hunt finds candidates. Fix drafts a PR. You still merge.

LIFE

Books swimming lessons, fills out forms, and sets up a watch for when next lessons open.

TASTE

Drafts the bio, shapes the card, fixes tee UX. I still correct the snapshot.

One real loop on `debbie.codes`. While I slept.

HUNT

Found candidates

Gates held. Nothing auto-filed.

ISSUE

Two Close menus

It found a duplicate Close on the mobile menu.

FIX

PR with proof

Playwright CLI screenshots. It reproduced before it fixed.

Bug report in. **Pull request out.**

You still merge.

The loop

Two jobs. Same shape every time.

Hunt finds. Fix ships proof. You still merge.

Hunt and fix are different jobs

Don't ask one bot to do both.

SITE-BUG-HUNT

Find and classify

Priority journeys via playwright-cli

a11y snapshots as primary evidence

Always write `qa/bug-candidates/`

Issues only when gates pass (or you elevate)

Looks. Doesn't change product code.

SITE-BUGFIX

Reproduce and ship

Reproduce first. Loud cannot-repro beats a fake fix.

Smallest honest fix, then verify before/after

Regression Playwright test when it pays off

Draft PR when asked / in CI. You still merge.

No repro? No code. No PR.

gates working

Two Close menus. confidence: high.
Severity: minor → no auto-file.

Hunt wrote qa/bug-candidates/mobile-duplicate-close-menu.md and stopped. I elevated it to an issue. The gates stayed honest.

classification: bug

confidence: high

severity: minor

issue: none (yet)

Summary

Production **site-bug-hunt** against `https://debbie.codes` (interactive mode) for ZurichJS talk prep — “**Bug Report In, Pull Request Out**”.

- Priority journeys covered: home, blog (search/tags/year/post), videos (+ pagination), podcasts, courses, about, speaking, contact, now, color mode, mobile nav, 404.
- Tooling: `playwright-cli` + accessibility snapshots; gentle crawl (~20 navigations).
- No product code/content mutations** in this PR.
- No GitHub issues filed** — nothing new cleared honesty gates for `classification=bug` + `confidence=high` + severity `major` / `blocker`.

Candidates (this run)

File	Classification	Severity	Notes
qa/bug-candidates/mobile-duplicate-close-menu.md	bug	minor	Best talk demo — two “Close menu” buttons on mobile
qa/bug-candidates/videos-jamstack-conf-dead-youtube.md	bug	minor	Dead YT id <code>H793eyVM_04</code> on <code>/videos/page/6/</code>

fix_surface: app

Mobile menu exposes two “Close menu” buttons

Elevated for ZurichJS talk prep (“Bug Report In, Pull Request Out” demo). Honesty gates correctly classify this as `severity:minor` / would not auto-file — Debbie elevated manually for the demo loop.

Repro

1. Open <https://debbie.codes/> at a mobile viewport (e.g. 390×844).

2. Tap **Open menu**.

3. Inspect the accessibility tree / query `button[aria-label="Close menu"]`.

Owner

Summary

Fixes duplicate mobile “Close menu” buttons (header toggle + overlay ✕) so screen-reader users get one dismiss control.

Elevated for ZurichJS “Bug Report In, Pull Request Out” demo prep (fingerprint `prod//mobile-duplicate-close-menu`). Honesty gates correctly mark this as `severity:minor`; Debbie elevated manually for the talk loop.

Repro (before any code change)

1. Open <https://debbie.codes/> at mobile viewport (390×844).
2. Tap **Open menu**.
3. Query `button[aria-label="Close menu"]` → **two** buttons (overlay ✕ + header ✕).

playwright-cli on production confirmed both controls in the a11y tree.

Fix

In `components/TheTopBar.vue`, hide the header hamburger while the drawer is open (`v-show="!isOpen"`). The teleported overlay ✕ remains the single “Close menu” control (header sits under the full-screen overlay anyway).

FIX

Draft PR with proof

HUMAN

Merge

Human review · a11y

✅ The fix is correct for the reported bug

The change (`components/TheTopBar.vue`): hide the header hamburger with `v-show="!isOpen"` while the drawer is open, leaving the teleported overlay's X as the single `aria-label="Close menu"` control.

Why it's sound:

- `v-show` applies `display: none`, which removes the button from the **a11y tree entirely** — not just visually. This is the right tool for the job.
- The header (`z-50`) sits under the full-screen overlay (`z-9999`, `fixed inset-0`) anyway, so hiding it has zero visual impact.
- Making `aria-label="Open menu"` static is safe — the button is only visible when the menu is closed. Keeping `:aria-expanded` bound is harmless.
- Removing the dead `<span>X</span>` branch is good cleanup.

Verified live on the deploy preview — after opening the menu: `Close menu` buttons: **1**, `Open menu` buttons: **0** ✓

Tests: the new regression test (`toHaveCount(1)`) + asserts the header toggle is gone from the tree) is well-written, and simplifying the existing test's `.filter({ hasText: 'x' })` is now valid. **All CI checks pass** (4× Playwright shards, Netlify preview, etc.).

⚠️ But it introduces a keyboard a11y regression

Copilot's review flagged this, and I confirmed it on the deploy preview:

- **Before:** pressing Enter on the hamburger kept focus on the toggle (relabeled "Close menu") — keyboard users could immediately dismiss.
- **Now:** the focused button becomes `display: none`, so **focus drops to `document.body`**. Since the overlay is teleported to the *end* of `<body>`, I tabbed 30 times and **never reached the X** — the user must tab through the entire page first.

Slightly ironic: an a11y fix that makes things worse for keyboard users — arguably worse than the original duplicate button.

Suggested fix (small):

```
watch(isOpen, async (open) => {
  await nextTick()
  if (open) closeBtnRef.value?.focus() // into the overlay ×
  else hamburgerRef.value?.focus()    // restore on close
})
```

fix: single Close menu control on mobile drawer debbie.codes

> ⓘ 🌐 ⋮

Review: [PR #623 — fix: single Close menu control on mobile drawer](#)

The core idea is right — hiding the header hamburger while the drawer is open is a reasonable way to leave a single "Close menu" control — but the implementation introduces two real regressions and one piece of dead code:

- Focus loss on open (correctness, confirmed):** [TheTopBar.vue:45](#) hides the button a keyboard user just activated via `v-show`, and nothing moves focus into the drawer — so keyboard/screen-reader users lose their focus position every time they open the menu. Pre-PR, the same physical button stayed in place, so this is a new regression, and arguably worse than the bug being fixed.
- Duplicate controls reappear during close (correctness, confirmed):** the header button's `v-show` toggles back instantly, but the overlay's close button is wrapped in a 250ms `<Transition>` and stays mounted/interactive the whole time — so for that window, two menu controls exist simultaneously, reproducing the class of bug this PR claims to eliminate, just on the closing edge instead of the open state. The new test doesn't cover this window.
- Dead `aria-expanded` binding (confirmed):** now that the button is only ever visible when closed, `aria-expanded` can never be observed as `true` by assistive tech — worth removing or documenting as intentionally moot.
- Altitude concern:** the header toggle and overlay close button are two separate elements kept mutually exclusive by hand (`v-show` vs `v-if + Transition`) rather than one coordinated control — which is exactly how #2 above slips in, and makes it easy for a future edit to reintroduce the original bug.

I also checked a "weakened test assertion" theory (that the now-static `aria-label` makes `toHaveAccessibleName('Open menu')` a no-op check) but that was refuted — the `v-show` binding keeps the locator behaviorally coupled to `isOpen`, so the test still catches a real failure to close.

Recommend adding a `nextTick + .focus()` (or a small focus-trap) to move focus into the drawer on open and back to the hamburger on close, and either removing the leave-transition delay mismatch or gating the header button's reappearance on the overlay's `@after-leave` hook instead of `isOpen` directly.

Debbie's Onboarding Coordination

+1

There you are 😊 I'll turn the snapshot into a shared mini-app so you and Debbie can edit it and leave anchored comments together.

bot was stopped.

@bot i love that you want to send me a tshirt. but i almost missed that message. you should make that message more prominent and not hidden under the snapshot box image thing. it just might get lost among the noise. remember people skim and dont read stuff. want to send it to me again in a better way so i can not miss it

👕

Debbie—we'd love to send you a PromptQL tee!

Please reply with:

- Tee size
- Full shipping address — name, street, city, postal code, and country

It's just you, Rajoshi, and me i's private bot. Once you send it, I'll repeat it clearly for Rajoshi to arrange shipping.

Built in chat · tee form

The image displays two side-by-side screenshots from a digital workspace.

Left Screenshot (Chat Interface):

- Header:** "Debbie's Onboarding Coordination" with a dropdown arrow and a "+1" indicator.
- Message 1:** A system message explaining that a "comment bubble" adds anchored comments and a "Post review to bot" button sends feedback.
- Message 2:** A user message from "dobriendev (you)" dated "13 Sept 2026, 10:30 pm" asking the bot for an interactive form.
- Message 3:** A bot response from "bot" dated "13 Sept 2026, 10:30 pm" using the model "gpt-5.6-sol". It confirms the request and provides a code block for a "Send to Rajoshi" button.
- Message 4:** A user message from "Rajoshi" dated "13 Sept 2026, 10:31 pm" saying "continue".
- Input Area:** A text input field with a "@ bot" placeholder and a "Share" button.

Right Screenshot (Shared Snapshot):

- Header:** "Artifacts (7) / Debbie's shared editable snapshot" with a refresh icon and a close icon. The timestamp is "13 Sept 2026, 10:29 pm".
- Section Header:** "Shared Debbie snapshot" with a subtitle "Edit the words directly, or comment on any card together." and buttons for "Edit snapshot" and "Reload".
- Status:** "Shared snapshot loaded. · Signed in as dobriendev".
- Notification:** A green checkmark icon followed by "Sent to Rajoshi" and a message: "Your tee size and shipping address were posted privately to this bot for Rajoshi to arrange shipping."
- Main Content:**
 - Header:** "RAJOSHI'S FIELD NOTES · SHAPED BY DEBBIE".
 - Profile:** "Debbie O'Brien" with the handle "@debs_obrien · AI-adventure mode: ON".
 - Bio:** "Early Hasura / GraphQL friend and Playwright expert turned enthusiastic explorer of AI, agents, Grok Bot and MCPs—with a chief-of-staff bot and a habit of testing whether bots can handle useful real-life work."
 - Interactive Cards:**
 - Job-hunt co-pilot:** Includes a compass icon and a "Post review to bot" button.
 - Aaentic shopping:** Includes a shopping cart icon and a "Comments" section with a "Comment" button.

Takeaways

01

One clear job per bot

Split hunt from fix. Split travel from stage.
Compose them.

02

You keep the yes

Merge, booking, and words. Ask. Don't invent.

03

Prove it

Reproduce before code. Eyes on the live site.
Shape in chat.

MONDAY

Spin up one bot

Give it one clear job. Keep the human gate.

Thank you.

Spin up one bot this week. Give it one clear job.
